

 **olsys**  
QUALITY OF LIFE

The IQ Panel 2 Plus includes 7" HD Touchscreen, a built-in 5MP camera and features PowerG, with the most robust wireless sensor line available. The IQ Panel 2 Plus also includes Qolsys 2.4 software, with powerful features such as Live View, Live Answer, Bluetooth Touchless Disarming, 4G & Wi-Fi Dual Path Connectivity and more.

The background of the advertisement is a photograph of a white wall next to a window with a blue frame. Two white, rectangular PowerG signaling devices are mounted on the wall. One device is a small, vertical rectangular unit, and the other is a larger, slightly taller rectangular unit. Both are connected by thin wires to a power source. The text 'PowerG Technology' is overlaid on the right side of the image.

# PowerG Technology

PowerG wireless signaling technology allows long range communication without the need to run expensive wires or cables - More than 4x the range vs legacy wireless security - Industry best encryption protects wireless signals against cyber threats - Automatic signal adjustment extend battery life when devices are closer to the panel - 2-Way communication provides remote access to reduce call-outs and improve performance - Proven line of security and life safety devices trusted across the globe. PowerG even secures an old US aircraft carrier that's now been turned into a museum

Up to 3 additional screens, fitted wherever you need them, with full functionality to control your system.

And when the panel isn't being used, it can be used as a digital photo frame, showing images of family, holidays or anything else that's special to you.

# Stream Cameras to the HD Screen

Live View completely changes the user experience in the home. Stream your live video cameras to the IQ Panel and IQ Remote with excellent resolution. Up to 40 camera's associated with the system will automatically appear, allowing you to easily select the desired video feed with a single touch, providing you with real-time visibility

# Answer the door from the panel

Live Answer completely changes the user experience in the home. Answer the door, using the Skybell Video Doorbell, straight from the IQ Panel or IQ Remote with excellent resolution. Talk and hear responses from your front porch. Mirrors the mobile app, allowing you to lock and unlock your door as well as arm and disarm your system.

# Bluetooth

## Touchless Disarming

When your panel is armed in "away" mode you simply need to come within range and it will disarm automatically. It's secure, encrypted, and individually authenticated, and you can add automation rules like "when system disarmed by authorized user, unlock the front door and turn on the porch light" making it so your home is unlocked and disarmed as you approach it and you didn't have to do a single thing to make that happen.

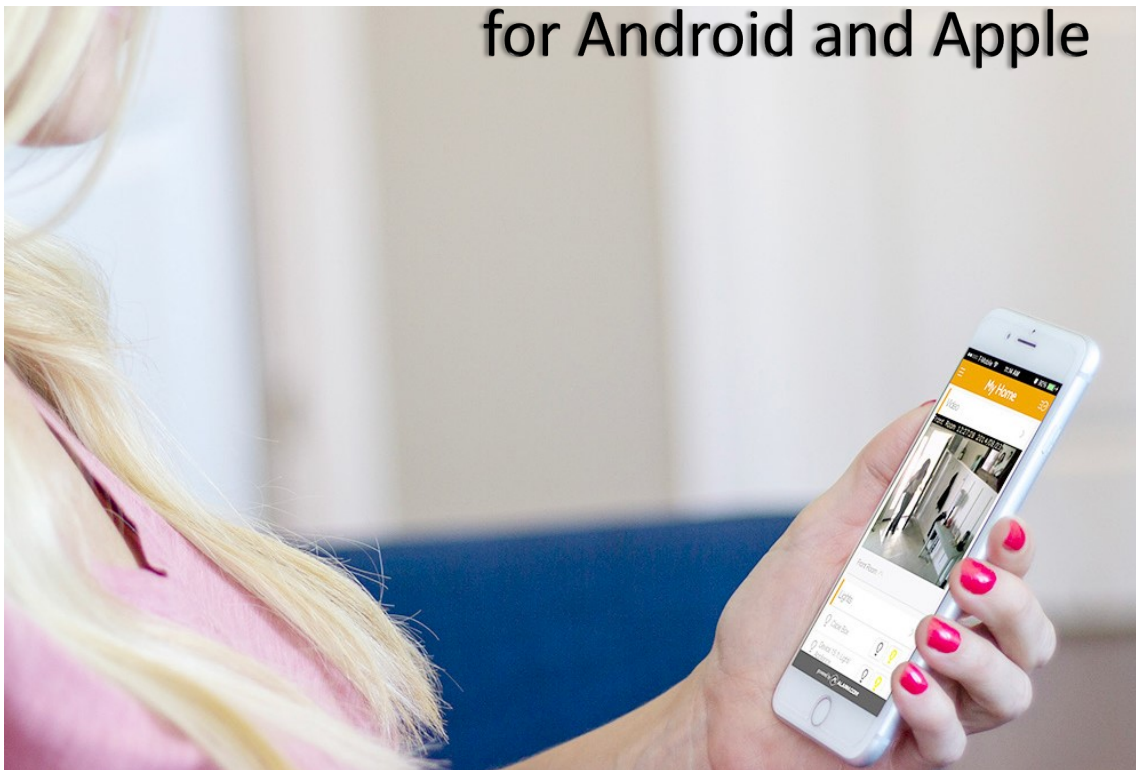

See who disarmed your  
system from anywhere

The IQ Panel has a 5MP camera built-in to the panel itself and is capable of capturing disarm photos and alarm videos. You can even receive these photos directly to your phone as a text message. Assign user codes to each member of your family and see when they get home with a picture texted right to your phone!

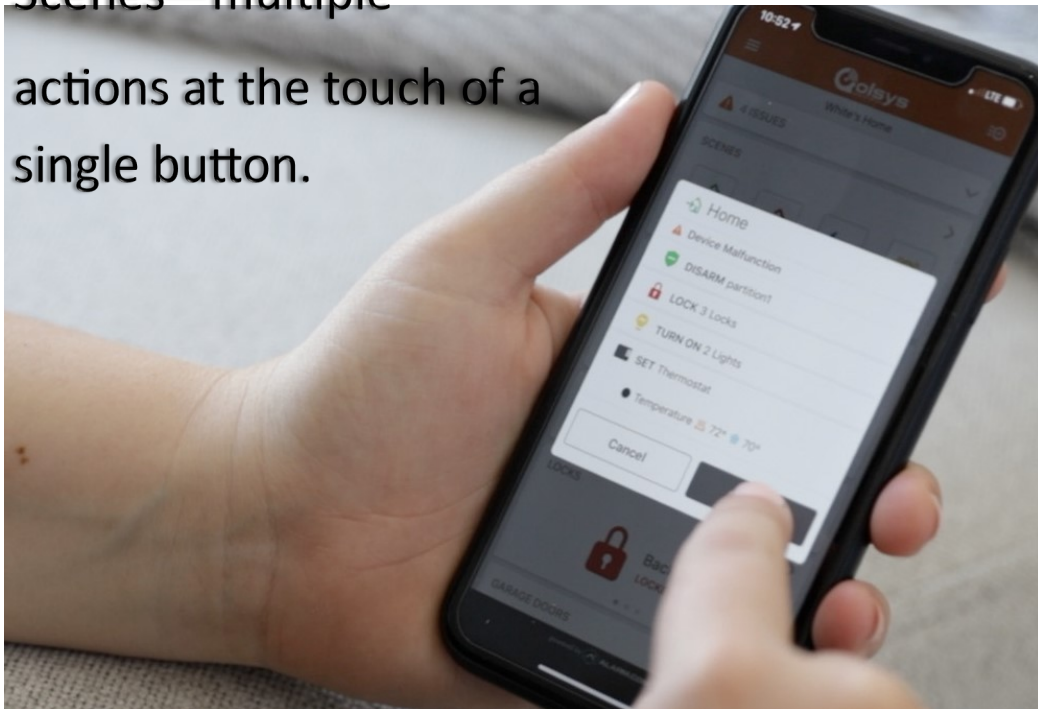

## Mobile app available for Android and Apple

Even when you are not at home you are always connected to your IQ Panel with the Alarm.com app. Arm your system, adjust your thermostat, lock your door, view your cameras and receive notifications and alerts sent via email or text message.

Scenes—multiple actions at the touch of a single button.

Using the Alarm.com Interactive Services, create scenes that are applicable to your lifestyle and daily habits. Use smart, connected devices around your home to create an energy efficient, intelligent ecosystem. Create a scene that helps secure your home for bedtime. With a touch, you can lock your front door, turn on your porch lights, turn off your main living area lights and then arm your security system in “Stay” mode. When you wake up, activate the scene to turn on your coffee maker, turn on the lights in your room and adjust your thermostat. If you leave for work, create a scene to lock your front and back doors, turn off your lights, turn down your thermostat, close your garage and arm your security system in “Away” mode.

# Geo-fencing

Using the Alarm.com app, create automation rules to help make your home smarter and more secure. Set rules specific to when you go further than 5 miles from your home, or when you come within 1 mile of your home. - Set automation rules such as "When I leave my home arm my system, lock my front door and adjust the thermostat" - Set other rules like "When I leave work adjust the thermostat"

# Security sensors

Door & Window Sensor

Motion Sensor

Glass Break Sensor

Vibration Sensor

Security sensors using encrypted PowerG technology, featuring battery-saving adaptive strength signalling, and with up to 4x the range of legacy wireless sensors

## Life-safety sensors

Smoke Detector

Flood Detector

Carbon Monoxide Detector

Life Safety sensors also using encrypted PowerG technology.

# Security cameras

See what's happening at your home in real time, no matter where you are. It's easy to check up on the kids, your pets, your valuables, and see what's actually happening in the event of an alarm.

And with Alarm.com's video analytics, your system can take different actions depending on whether it sees a person, a vehicle or an animal.

# Video Doorbell

See who's at the front door with the Alarm.com Wi-Fi Doorbell Camera. Two-way voice communication through the Alarm.com app lets you speak to visitors at the door, from anywhere. If you choose, unlock the door from that same screen in the app.

# Smart Switch

- Allows control to turn any plug On or Off remotely
- Plugs into any standard outlet
- Works great for coffee makers or hair dryers
- Set automation rules such as "Turn on at 6am" or "Turn off at 7pm"
- Acts as Z-Wave repeater

# Smart Thermostat

- Remotely control your thermostat from anywhere using your smartphone
- Easily save money on your energy bills
- Adjusts itself automatically when you are not at home and resume the schedule when you return
- Seamlessly integrate with your IQ Panel using rules such as “If the front door is open longer than 5 minutes, adjust the thermostat”
- Create custom smarthome automation features like “Adjust the thermostat when I leave my house” or “Adjust my thermostat when I come home”
- Create scenes with your thermostat such as a “Sleep” scene and the IQ Panel will arm the system and adjust the thermostat.

## Smart Door Locks

The IQ Panel 2 supports Z-Wave door locks from Ultion. Creating custom rules powered by Alarm.com you can arm your panel, deactivate your thermostat, and turn off your lights, all by locking your door.

# Smart Lighting

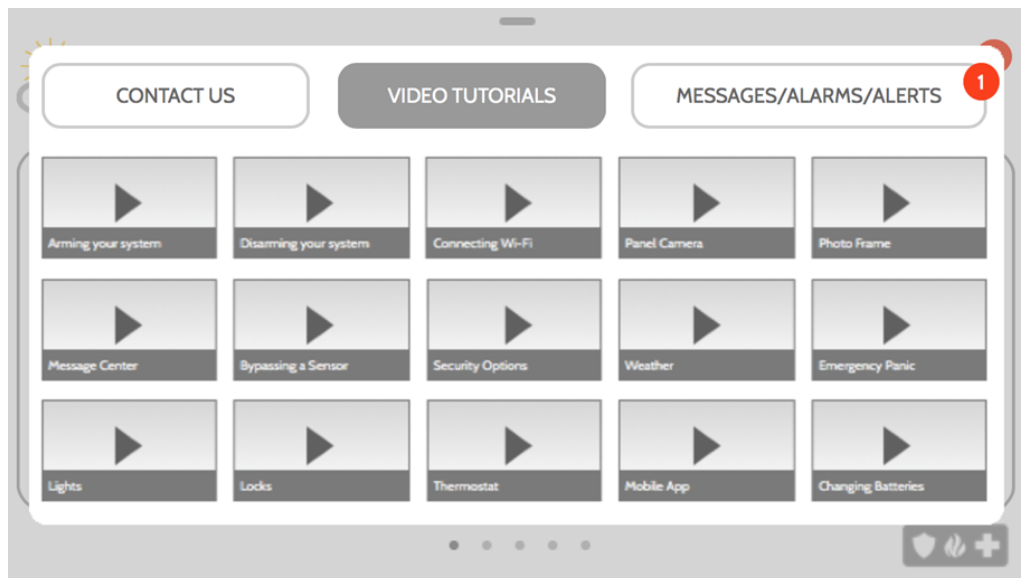

Z-Wave LED lighting allows you to save money. LED bulbs use less energy, and by creating automation rules, your Qolsys system can automatically turn off the lights when a room is unoccupied, and make sure that external lights are off when you go to bed.

# Photo Frame

When it's not busy protecting you and your family, and simplifying your life, the panel and remotes double up as a digital photo frame. Upload your choice of photos via SD Card and smile at your memories.

## Not sure how something works?

Qolsys has a wide range of tutorial videos built into the panel, so if you're unsure how to do something, search through these. If your questions aren't answered, then call our technical assistance team.

## Regular Software Updates

Remember, Qolsys started with a tablet, so the software is always changing, always improving, often based on client feedback. Updates are usually released twice or three times a year. Your panel tells you that an update is available, you tap the button, and your update is installed.

# Now it's up to you
